### Experience

June 2020 – November 2020

#### **Web Developer** *Studio Atelier*

- Site redesign and replatform

April 2015 – May 2019

#### **Sr. Front-End Developer** *Mercutio*

Primarily concerned with the front-end but frequently handling back-end code (Building modules/APIs) on a variety of platforms with a focus on Magento (e-commerce).

- Handled front-end portion of replatforming Magento 1 to Magento 2, which involved organizing custom/third-party JS into RequireJS modules, migrating CSS to SCSS, and adapting older layouts to Magento 2's more sophisticated layout layer.
- Revamped UI for Magento 1 & 2 sites, moving to more modern libraries such as jQuery and Bootstrap.
- Implemented a data-layer for the frontend of Magento sites in order to help with more heavy caching and dynamically interpolating user info and pricing into the UI.
- Implemented a shared cart experience across multiple storefronts.
- Developed interactive infographic which animates as you scroll, using ScrollMagic and GreenSock.
- Multiple AngularJS SPAs and modules.
- Prototyping with ReactJS.
- Created single page experience shopping-cart/checkout using ReactJS.
- ReactJS selector tool to help choose a product.
- Developed custom product configurator for WooCommerce site.
- Helped with mentoring junior devs and making the onboarding process a more gradual transition.

August 2013 – April 2015

#### **Web Developer** *Artists Line*

- Ground up custom e-commerce site utilizing Laravel and Stripe.
- Replatformed site onto Shopify.

February 2013 – March 2014

#### **Web Developer** *Studio Atelier*

- Built CMS site for art school.

May 2013 – August 2013

#### **Jr. Web Developer** *RealtyFire*

- Prototyping different layouts for the senior developer utilizing HTML, CSS, and JavaScript.

November 2012 – April 2013

**Jr. System Admin** AClickAway.com

- Took charge in implementing a Windows environment in a medium sized corporate office, including networking and VoIP technologies.

August 2011 – April 2012

**Service Desk Tech** *Arise Virtual Solutions Inc.*

- Followed a call handling procedure to resolve customer technical issues. Provided level one support and escalated issues requiring further attention.

July 2010 – August 2011

**Help Desk** AchieveGlobal

- Level one help desk support technician. Responsible for client-side applications on Windows and Mac platforms as well as hardware support.
